EXPERIENCE

Senior Unity Developer • Tec Ventures

Apr 2024 – Present

- ▶ Sole engineer on Mystic Motors — shipped end-to-end to Google Play & App Store; integrated Google/Apple/Guest Login, Firebase IAP, and Firestore leaderboards, achieving a live dual-platform monetised product within 4 months.
- ▶ Owned full mobile build pipeline (Android + iOS): CI builds, Firebase Crashlytics monitoring, and staged rollout — zero critical post-launch crashes across initial 1,000+ installs.
- ▶ Architected spell-based multiplayer combat loop with Photon PUN2; optimised network sync intervals, cutting observable input lag by ~35% versus naive approach.
- ▶ Mentored 1 junior developer on Unity best practices, code review standards, and Git branching strategy — reduced rework cycles by 50% within 2 sprints.

Unity Developer → Mid-Level Unity Developer • Abhiwan Technology Pvt Ltd

Mar 2021 – Mar 2024

- ▶ Delivered 5 client-facing Unity projects in 3 years across mobile and PC — all shipped on schedule with zero scope-blocking bugs at handoff, earning repeat client contracts.
- ▶ Designed and built Classroom Metaverse: multi-platform (PC/Android/iOS) virtual classroom with Agora Voice SDK + Photon supporting 30+ concurrent users and real-time screen sharing.
- ▶ Cut API round-trips by ~40% in the 3D Instagram clone by replacing polling with Socket.IO event-driven architecture, directly reducing session load time from ~4s to ~2.5s.
- ▶ Took ownership of technical scoping for new feature requests — translated client briefs into sprint tasks, reducing estimation errors and preventing mid-sprint scope creep on 3 consecutive projects.

SHIPPED PROJECTS

Mystic Motors — Android & iOS | Unity 3D • C# • Firebase Auth • Firestore • IAP • Photon • FCM

[▶ Play Store](#) • [▶ App Store](#)

Published cross-platform racing game with spell-based combat, multi-map progression, and full monetisation stack (IAP, Unity Ads). Google/Apple/Guest SSO, Firestore leaderboards, Firebase push notifications, and Crashlytics. Live on both Android & iOS.

Adventure Trip: World Wonders — Google Play | Unity 3D • C# • Firebase • Figma • FCM • REST API

play.google.com/store/apps/details?id=com.Point8Games.AdventureTripWondersoftheWorld

Hidden-object puzzle game with 10+ timed levels. Firebase Firestore for cloud save & progress sync; FCM for re-engagement notifications. UI/UX designed in Figma and pixel-perfectly implemented in Unity.

Slot Game — Live WebGL (Browser) | Unity 3D • C# • WebGL • DoTween • REST API • Figma

slotgameunityweb.netlify.app

Zero-install browser slot game deployed via Unity WebGL. Dynamic payout logic via REST API; DoTween-driven reel animations at 60fps. Figma-to-Unity UI pipeline with < 2px layout deviation.

TECHNICAL SKILLS

Engine & Language: Unity 3D / 2D • C# • C • Unity WebGL • Unity Addressables

Multiplayer & Network: Photon PUN2 • Socket.IO • WebSocket • Agora Voice SDK

Backend & Auth: Firebase Auth • Firestore • FCM • In-App Purchases • REST API • Google/Apple Login

UI/UX & Design: Figma • UI/UX Design • DoTween • Unity UI Toolkit • Ready Player Me

DevOps & Tools: Git • Firebase Crashlytics • Unity Cloud Build • Android Studio • Xcode

Platforms: Android • iOS • PC • WebGL

EDUCATION

BCA • Hi-Tech Institute of Engineering & Technology

2020 – 2023 • 70%

Intermediate (PCB) • P.C. Senior Secondary School

2020 • 75%
